2. Outcomes of activity:

- To make aware about what is Gender Equity
- **Equality** is about ensuring that every individual has an equal opportunity to make the most of their lives and talents. It is also the belief that no one should have poorer life chances because of the way they were born, where they come from, what they believe, or whether they have a disability
- Why is **gender equality important**? **Gender equality** is intrinsically linked to sustainable development and is vital to the realization of human rights for all. The overall objective of **gender equality** is a society in which women and men enjoy the same opportunities, rights and obligations in all spheres of life. To make aware about women's right. To know about silent features of this act.
